

1. Install SyncSlide_for_OBS.dmg
2. Choose folders that you want to show at OBS
3. Create folder for web-server, index.html will be created there
4. Click START, your images start to show at Browser URL

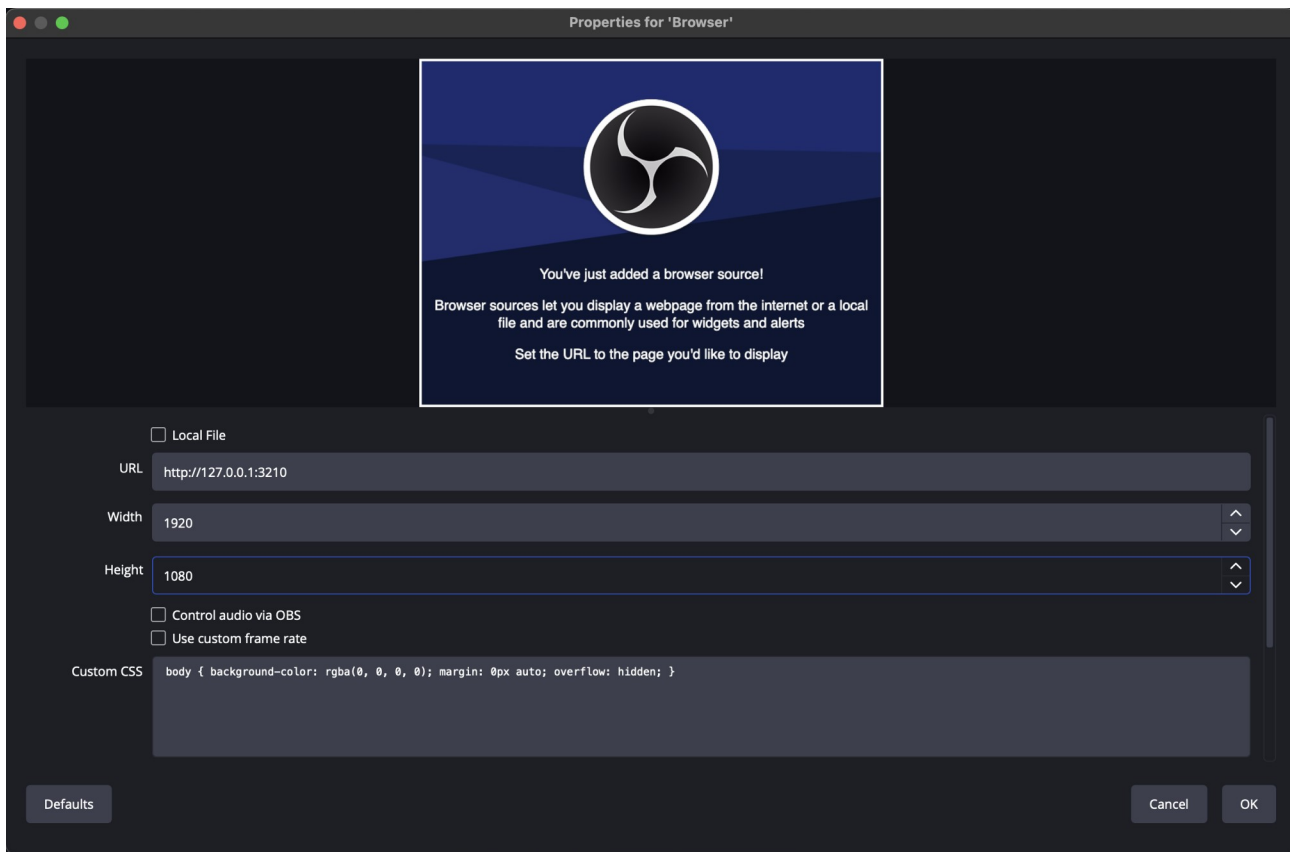

At OBS

1. Create New SCENE

2. At Sources choose Browser

For URL copy "Browser URL" from SyncSlide for OBS and hit OK.

Now you can show image slideshow from google drive and when you put new images to the folder, they show automatically at OBS, no refresh needed.

Use freely.
